SUMMARY

I am studying Computer Science and Engineering at BAUST. Now I'm in the last year. I am skilled in Problem Solving, Data structure, Algorithms, and Python. I'm interested in the software development field, Cloud Computing, Frontend and Backend development. I have some experience working in Linux environments, Git, and Android studio. I am looking for the opportunity to enhance my skills and build a career in software and mobile application development.

EDUCATION

- Bangladesh Army University of Science and Technology** Saidpur, Rangpur, Bangladesh
Bachelor of Science in Computer Science and Engineering; GPA: 3.29/4.00 2021 – 2026
- Chuadanga Government College** Chuadanga, Bangladesh
Higher Secondary Certificate; CGPA: 4.56/5.00 2018 – 2019
- Alamdanga Pilot Government Boys High School** Chuadanga, Bangladesh
Secondary School Certificate; CGPA: 4.55/5.00 2016 – 2017

SKILLS

- Problem solving:** Competitive Programming, Data Structure, Algorithm, Database.
- Languages:** Flutter, dart, Python, C++, XML, Node.js, Java
- Technologies:** Git, Networking, Database, API, mongodb
- Tools:** Android Studio, Firebase, Postmaster.

PROJECT

- Flutter- Study Notes Selling app - Your Notes** Dec. 2025 – Currently
Flutter, Dart, GETX, Express, MongoDB, Node.js, Android Studio
It is one kind E-commerce Mobile Application Project with an Admin Panel, like Fiverr, Upwork's. In this project, It a Multi-vendor projects where there will be two types Buyer and Seller just like Fiverr, but in this case the seller will sell class notes or assignment.
- Flutter- Result Management System** Nov. 2025 – Currently
Flutter, Dart, Android Studio, Firebase
It is a Cross-Platform Application for Automation of my University Result System, so that the result making and views can be more helpful and for students more privacy. This project is made with Flutter as framework, dart a backend logics and firebase as data.

- **Flutter- E-commerce Application with admin panel (Philflowers.com)** Jun. 2025 – Currently
Flutter, Dart, GETX, Express, MongoDB, Node.js, Android Studio
It is an E-commerce Mobile Application Project with a Admin Panel. In this project, It a single vendor projects where the admin can add, update & delete products using the admin panel connected with mongoBD database using a node.js server and customer can buy products using the mobile app, it has online payment gateway like stripe payment.
- **Flutter-Food Recipe App (Foody)** Jul. 2025 – Jul 2025
Flutter, Dart, Firebase (Authentication & Firestore), Android Studio
It is a Mobile Application Project. In this project the app will show different type of food recipe according to country and category. The recipes are fetched from a food recipe API.
- **Flutter-Job Finding & Resume Analysis application (Job Linker)** Jun. 2025 – Jul 2025
Flutter, Dart, Firebase (Authentication & Firestore), Android Studio
It is a Mobile Application Project. In this project, I have made a Job finding app named **Job Linker** where the user can find jobs in nationally or internationally, User can also create a company to create jobs, there will be an inbuild resume builder and resume analyzer (working on it) . To build this project, I have used Flutter Framework, Dart Programming Language, Firebase (Authentication & Firestore) Database, Android Studio. Used Azure api for fetching the job data.
- **Flutter-Chatting Application** Jun. 2025 - Jun. 2025
Flutter, Dart, Firebase (Authentication & Firestore), Android Studio
It is a small Mobile Application Project. In this project, I have made a chatting app named **The Talking** where the user can chat with other person using their verified emails. To build this project, I have used Flutter Framework, Dart Programming Language, Firebase (Authentication & Firestore) Database, Android Studio.
- **Flutter- To-do List- CheckMark- Application** Jun. 2025 - Jun.2025
Flutter, Dart, Firebase (Authentication & Firestore), Android Studio
It is a small Mobile Application Project. In this project, I have made a To-Do list named **Check Mark** where the user can Store there ToDo's. To build this project, I have used Flutter Framework, Dart Programming Language, Firebase (Firestore) Database, Android Studio.
- **Flutter- Notepad- Application** Jun. 2025 - Jun.2025
Flutter, Dart, Firebase (Authentication & Firestore), Android Studio
It is a small Mobile Application Project. In this project, I have made Notepad named **Notepad** where the user can Store there Important Notes. To build this project, I have used Flutter Framework, Dart Programming Language, Firebase (Firestore) Database, Android Studio.
- **Flutter- Weather- Application** Jun. 2025 - Jun.2025
Flutter, Dart, Firebase (Authentication & Firestore), Android Studio
It is a small Mobile Application Project. In this project, I have made Weather named **Weather** where the user can see weather report, daily forecast & hourly Forecast's. To build this project, I have used Flutter Framework, Dart Programming Language, Myweather API, Android Studio.

- **Online food ordering System**

Jul. 2024 - Sep. 2024

HTML, CSS, PHP

It is a small web-based Project. In this project, I have made a website for ordering food from the nearest restaurants from home. To build this project, I have used HTML, CSS, php & used mySQL as a database.

CODING PLATFORMS

- **Codeforces:** Solved 450+ Problems

COMMUNITY, SERVICES AND EXPERIENCES

- Former President, at BAUET Computer Society
- Chief of Staff, Hult Prize at BAUET
- Former Joint General Secretary, BAUET Welfare Club
- Former Deputy Campus Director, Hult Prize at BAUET
- Former Secretary of Design, at BAUET Computer Society
- Campus Ambassador, 10minuteschool
- Former Campus Ambassador, kampusgroupbd
- Former Executive of IT, at BAUET Career Club
- Former HR secretary, BAUET Welfare Club
- Former Volunteer, North Bengal Startup Summit 2023, Rajshahi
